

Nocturnal Session:

A live weekly webcast, dedicated to those involved in the electronic dance music community aimed towards informing, involving, and connecting the community in a positive way.

Here at Nocturnal Sessions, or "N.S.", our main goal is producing content that gives our viewers the ability to watch and even participate in a live newscast atmosphere- reviews, discussions and interviews related to past, current, and upcoming events.

N.S. also aims to get the viewers and users directly involved in the action, enabling those who watch the live webcast to interact with our guests on the show through the chat room, text messages, or phone calls.

N.S. is also geared to serve as platform for DJ's and production companies to interact with their fans or followers on a more personal level. They will be able to speak directly to the community and visa versa as our attitude is that viewers issues, concerns, and ideas are important and they will be addressed and embraced whole-heartedly.

N.S. is a new idea and is open to any and all suggestions. Our goal is simple, connect you and others who share the same general interest by providing a free flow of information and a place for your voice to be heard.

"We of the electronic dance community have our own massive events, social networking, forum, and photo sites... Why shouldn't we have our own news cast?" - Conjunktion
